

# Chairman's message

Hareket will lead the way to the future of lifting, transport and installation services, serving to customers with the safest and most responsible way.

Since our establishment in 1957, we have proven that our versatility and adaptability to meet the customer requirements distinguishes us from our competitors. We are proud of our creative engineering, professional project management system, state of the art heavy lifting and transportation fleet and professional team.

We will continue to grow together with our clients as partners as experience is our foundation, engineering our passion and customer satisfaction our motivation.

**Ahmet ALTUNKUM**

# About us

## **Experience - Our Foundation**

---

Hareket provides engineered heavy lifting and transportation services to its clients for more than 60 years. These services also include project planning, route surveys, lift engineering, project management and installation works. With a strong proven track record of projects within Turkey and the Caspian region we serve clients throughout the petrochemical, renewable energy and power industry and concentrate on greenfield, shutdown, maintenance and offshore projects. With our headquarters located in Istanbul, Turkey, we are operating internationally in Europe, Asia, Middle East and Africa.

## **Engineering - Our Passion**

---

Over the years Hareket has been known for its high service standards and reliability. We, as a solution partner, plan every stage to the smallest detail prior to the beginning of your project upon completion. The feasibility analysis is carried out carefully with in-depth technical know-how by our engineers. A technical evaluation right from the start ensures a professional preparation of your project. Transport and installation services are conducted by using international standards, state of the art equipment and under the supervision of our experts on-site.

## **Customer Satisfaction - Our Motivation**

---

We offer our services and equipment to a broad range of sectors. Each industry has its individual working standards and safety requirements. Due to our proven track record and expertise within the region our team of specialists has a profound understanding of these specific needs. We make sure that you receive the support you need and the project will be executed in a timely and safe manner.

# History

Hareket Heavy Lifting and Project Transportation Co. was established to provide bond-discharging service in the Port of Karakoy-Istanbul.

1957

After having initiated the incorporation with 3 partners, Hareket turned into a family company under the leadership of Abdullah Altinkum.

1984

# Strengths and Values

For more than 60 years, Hareket successfully provides engineered heavy lifting and transportation services to clients. They trust us that their project will be executed safely, cost-effectively and on-schedule. Our dedicated team, broad knowledge, flexibility, and dedication to safety enable Hareket to fulfill this commitment every day.

## **Tailor-made solutions**

---

We enjoy working together with our clients and finding the best solution for their specific heavy lifting or transport needs. We do not accept mediocrity as every project is unique. Our ambition is to build long-term relationships with our clients. We are passionate about what we do - this enables us to discover innovative and creative engineering solutions. This versatility is highly appreciated by our clients and differentiates us from our competitors.

## **Global vision**

---

A vision gives a picture of the future that creates passion in people. This gives direction, helps to define our aspirations and purpose become a reality. Hareket serves clients successfully throughout – but not limited to – Europe, Asia, Middle East and Africa. With our clients as partners we strive to grow together and expand our business beyond the current regions.

### **Professional engineering service** \_\_\_\_\_

We are proud of our in-house engineering services. Our creative engineers support you with route surveys, compiling transport and lifting plans, equipment configuration or create individual solutions. Our team sets itself apart by an in-depth technical know-how and their professional expertise to excel in daily operations.

### **Quality - what we do, we do well** \_\_\_\_\_

Results at the highest level distinguish us and have made us who we are today. We constantly strive to inspire our customers with excellent quality of work, reliability and innovative solutions. We seek to outperform and listen to improve. We work towards a common objective, because we are proud of our achievements and how they differentiate us from others.

### **Safety and reliability** \_\_\_\_\_

A good reputation isn't earned, it's built. We don't compromise when it comes to safety and make sure every employee returns home safely. While maximizing safety of our people, clients and communities we work in, we focus on minimizing risks and costs. This defines us a reliable partner.

# Engineered Heavy Lift and Transport Services

The main objective in transportation is reaching the destination as fast, safe and cost efficient as possible. Hareket provides complete engineered solutions for your heavy lifting and transport requirements.

Following the transportation and discharging processes, Hareket's professional crew places and installs the cargo with state of the art technology.

Heavy lifting and transportation services entails equipment such as cranes, gantries, strand jacks, self-propelled-modular and conventional trailers. Aside from the kit our team composed of specialists from the industry supply engineering, planning, supervision and project management during execution of a project. Our standards comply with the highest international safety and quality standards. Hareket strives to continuously improve its safety and quality management.

We are regularly listed in the ICT50 (top 50 leading transport companies) and IC 50 (top 50 leading crane companies) and proud to receive many awards from leading crane and heavy lift transport industry organizations such as ESTA.

# Load-out Services

Hareket also specializes in load-out services. Our engineers and naval operations team have extensive expertise in load-outs and transportation engineering of offshore structures, modules and other types of loads. These services for the offshore market and modularization projects include, but are not limited to:

- Site assessment
- Load-out methodology and analysis (by lifting, trailer, skidding)
- Mooring
- Ballasting
- Sea fastening
- Barging
- Towage services.

# Equipment Rentals

We rent well maintained equipment with skilled operators to ensure operational excellence to our clients. Hareket's extensive fleet comprise:

- Mobile and crawler cranes
- Hydraulic lifting systems (gantry)
- Strand jack systems
- Skidding and jacking equipment
- Self-propelled modular trailers (SPMTs)
- Hydraulic and low-bed trailers
- Prime movers
- Auxillary equipment.

# Renewable Energy Complete Solutions

Amongst ever-growing electricity demand, increasing fuel costs, and climate change concerns, renewable energy can make a difference for sustainable power supply. Especially wind energy is a reliable and increasingly cost-competitive source of clean energy with the potential for further cost reductions.

Hareket proudly serves a significant share of the onshore renewables market in the European and Asian regions. We provide transportation from factory to site, erection services and electro-mechanical completion to the grid-line with our dedicated specialists. Our expertise in the wind energy market enables us to provide complete solutions to OEMs, contractors, and owners. Turn key solutions help customers transform renewable energy into a profitable asset for a sustainable tomorrow.

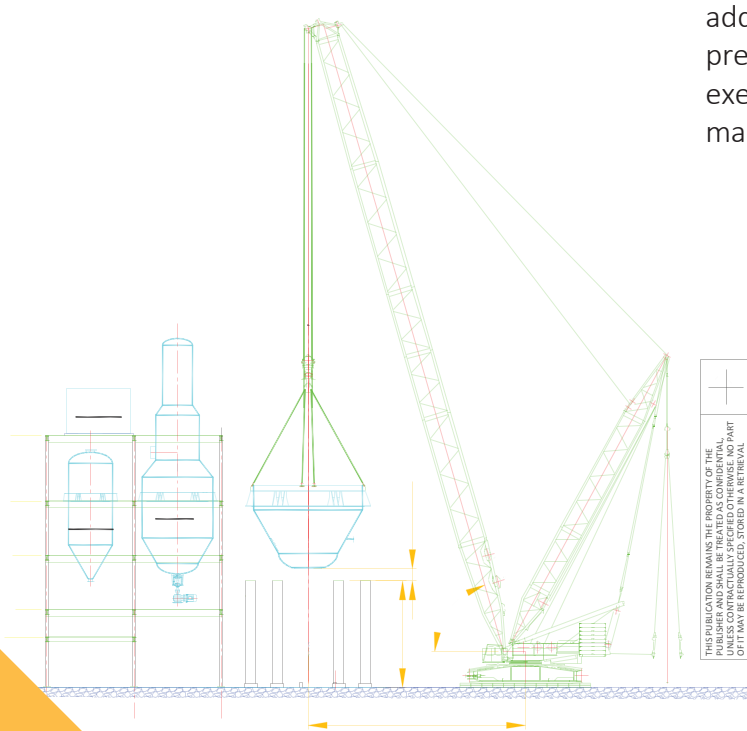

# Rigging Engineering and Transport Survey Consultancy

We offer our clients rigging, modularization, offshore and onshore transport solutions during FEED stage or bidding phase.

An early involvement in planning and even design stage is key for a smooth project process and economical operation. Every project is unique and so are their needs. Hareket is proud of its creative engineering services such as route surveys, transport and lifting plans, equipment configuration to create individual solutions and provide value added services to our customers. A solid preparation ensures that your project will be executed in a timely, cost efficient and safe manner.

# Sectors

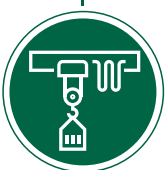

We offer our services and equipment to a broad range of sectors. Each industry has its individual working standards and needs specific expertise.

## Choosing the right partner

Our services involve equipment such as cranes, gantries, strand jacks, self-propelled-modular and conventional trailers. Apart from the kit, our team makes the difference. Our specialists supply engineering, planning, supervision and project management during project execution. We help several sectors to minimize downtime and optimize the construction efficiency with regards to heavy and oversized loads.

## Sectors

Civil Construction  
Infrastructure

Nuclear  
Power

Petrochemical

Power

Renewable  
Energy

Shipyards

## HSE-Q

Hareket has proved that it is the pioneer of project transportation and freight shipment services in all industrial sectors in the direction of its work with its stakeholders. It set its heart on bringing innovations to our country as technology evolves, developing what it learned, and presenting faster, more solutioner approaches.

All our work is carried out in accordance with the standards of Health, Safety and Environment Policy with the quality standards. We believe that ISO 14001 and OHSAS 18001 certifications and the Health, Safety and Environment Policy are the keystones of our success and service quality. Within the framework of our company policy, we adopt the management system established in accordance with ISO 9001 Quality Management Systems. Each department of our company and every planning method is reviewed and updated in accordance with today's technology and quality criteria.

## Certifications

---

With our ISO 9001 Quality Management System certificate, customer applicable legislative requirements are met and new services are added to services provided through feedbacks from the customers. In all our projects standards, regulatory criteria and customer feedbacks are evaluated together.

With our ISO 14001 Environmental Management System certification, we comply with national and international legal regulations. Since environmental management is not only within standards but also important for our country and future generations, environmental education is part of our vision and mission as one of the first elements of our corporate policy.

In our working environment, the legislation regulated by our OHSAS 18001 Occupational Health and Safety Management System certificate is the manual of our employees and ours. The happiness of our employees means the happiness of all of us. The happiness of our customers depends primarily on the employees of our company, who have high morale and solutioner thinking. As Hareket, we consider our primary priority to provide the necessary discipline and training in our potentially hazardous operation field.
